

Drone Detection & Airspace Intelligence for Stadiums and Events

The Drone Reality

2.8K

Unauthorized drone flights were reported over NFL stadiums in 2023

20%

Year-over-year increase in drone violations at major sporting events

10M+

Consumer drones expected to ship this year

Drones threaten stadiums and events with disruption, surveillance, and public safety risks. Most security teams still lack the visibility and control to protect their airspace.

SkySafe equips your team to protect large crowds from unauthorized drones, before, during and after every event.

SkySafe helps public safety teams to

Detect drones entering your stadium or event airspace and identify the drone operator and point of origin

Track live location, speed, altitude, and behavior while automatically capturing courtroom-ready forensic reports for each incident

Prevent escalation or event disruption with faster decision-making technology

The players, the fans, and our sponsors are our number one priority.
SkySafe helps us ensure they stay safe.

The Growing Security Challenges for Public Events

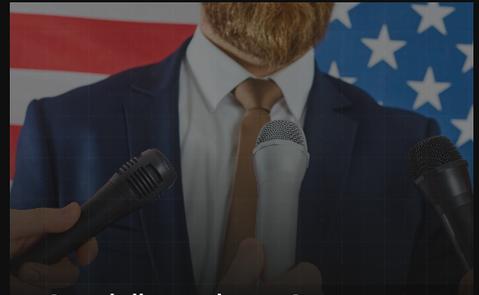

Drones are creating new vulnerabilities for concerts, stadiums, and other large public gatherings.

Police seized two drones flown over Taylor Swift's Concert in Liverpool

Unauthorized drone prompted the NFL to briefly pause the AFC Championship

Goodell speaks to Congress about the security issue of drones on NFL game days

These aren't isolated incidents—they're part of a troubling trend. **But SkySafe can help.**

How SkySafe Secures Large-Scale Events

Detect

Monitor your airspace in real time with secure cloud-based access and automated, real-time alerts.

Analyze

Determine whether drones are authorized or threats using UAS fingerprinting and behavioral intelligence

Act

Map flight paths and altitude, then generate detailed incident reports and extract data using SkySafe's forensic capabilities

From Drone Detection to Action

SkySafe ensures public safety with real-time drone detection and post-event forensics, all purpose-built to protect concerts, stadiums, and events.
